## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

*Andreano (WO 96/02034)* discloses the firmware is updated with computer programs downloaded into the flash memory from a host.

*Shinkawa Katsuhito (JP 1127234)* discloses updating an execution program in a peripheral device single body by providing CPU and an overwriting means, and overwriting an external execution program to a nonvolatile storage.

*Seki Masami (JP 2000263897)* discloses update control program is downloaded by a downloaded control means.

*Bacon et al. (U.S. 5,440,632)* discloses downloading new program code and that the boot program may download code to different configurations of subscriber terminals including those with flash EPROM or extended memories from plug-in expansion modules.

The prior art of record (namely, *Andreano (WO 96/02034)*; *Shinkawa Katsuhito (JP 1127234)*; *Seki Masami (JP 2000263897)*; and *Bacon et al. (U.S. 5,440,632)*) do not teach, disclose or suggest the combined claimed limitations of: overwriting a program registered in a program memory of a main body of a data control apparatus; downloading control programs of extension devices to a plurality of extension devices which are connected to an extension device interface of the data control apparatus; transferring and receiving control data between the extension devices and the data control apparatus through control data communicator; and downloading the control

programs for the extension devices through a download exclusive communicator, as claimed in independent claim 24. Claims 1, 3, 5, 16, 20 and 22, recite similar claimed features and are therefore allowed for the same or similar reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
